Asbestos Notification Statement

The county requires each building permit for the demolition or renovation of an existing structure to contain this Asbestos Notification Statement which indicates the owner's or operator's responsibility to comply with the provisions of Section 469.003, F.S., and to notify the Department of Environmental Protection (813-470-5700) of his /her intentions to remove asbestos, when applicable.

Federal and State regulations strictly regulate the removal and disposal of asbestos and asbestos containing products on or within buildings or structures. This includes all roof coverings, sidings, insulation or other building components which include asbestos.

Federal and State regulations strictly regulate the removal and disposal of asbestos and asbestos containing products on or within buildings or structures. This includes all roof coverings, sidings, insulation or other building components which include asbestos. The following requirements are from Florida Statutes, Chapter 455: removal, encapsulation, or enclosure of asbestos materials may only be performed by licensed asbestos abatement contractors (with limited exceptions for small-scale short duration activities). Preparation of plans for such work must be made by a licensed asbestos consultant. If alterations to a buildings structural, electrical, mechanical, or other system or components are being made, then such plans shall also be sealed by a registered architect or engineer. Certified roofing contractors who have met the requirements of Chapter 455.302(2)D Florida Statutes, may remove asbestos containing bituminous resinous roofing materials. Typically, this refers to built up roofs where asbestos containing felts were used in the roofing plys. Asbestos tile roofs are not included in this exception.

Chapter 553.79(11) Florida Statutes requires the following notification statement to be read when projects involve the demolition or renovation of an existing structure: "Owners or operators demolishing or renovating structures must comply with the laws and regulations applying to asbestos. Also the applicant understands that failure to comply with such regulations will subject them to the penalties prescribed by Federal and State laws and revocation of any permit(s) issued for this project.
